
Timmins Flood Advisory Committee**NEWS RELEASE****FLOOD WARNING – MATTAGAMI RIVER,
PORCUPINE LAKE & KAMISKOTIA LAKE****Water Levels Remain High on Mattagami River,
Porcupine Lake and Kamiskotia Lake.****Date of Issue—Monday, November 14, 2022**

(Timmins, ON)— The Timmins Flood Advisory Committee is extending the Flood Warning for the watershed to include Kamiskotia Lake along with the Mattagami River and Porcupine Lake. A Flood Warning message serves as notification to the general public that localized flooding may occur.

The Committee reports that water levels on rivers, streams and lakes throughout the watershed remain high in response to the recent rain. Any increase in the water levels over the coming days is difficult to predict and will depend on the weather. Low-lying areas are currently experiencing nuisance flooding. Everyone living in or near a flood hazard area is encouraged to monitor the conditions that are developing and to take the appropriate actions to protect their property.

The Timmins Flood Advisory Committee will continue monitoring water flows and elevations and will keep the public informed of the situation through further news releases and bulletins.

Residents can visit the MRCA website at www.mattagamiregion.ca for the latest information on watershed conditions and public advisories, or to sign up for flood notifications via email.

This message will be in effect until (or updated before) November 18, 2022.
