
TIMMINS FLOOD ADVISORY COMMITTEE**NEWS RELEASE****WATERSHED CONDITIONS STATEMENT EXTENDED
WATER SAFETY**

Date of Issue – Tuesday, April 22, 2025

(Timmins, ON) – The Timmins Flood Advisory Committee continues to review up-to-date information regarding local water levels. As such, the current Watershed Conditions Statement: Water Safety has been extended. The watershed is still reacting to snow and ice melt and precipitation.

Residents are advised to use extreme caution when near rivers and waterbodies where slippery stream banks, thin ice, dangerous currents and fast-moving cold water will make waterways very hazardous.

The Committee will continue to monitor the situation on a daily basis and issue updates as more information is known, or if water conditions change.

Residents can visit the MRCA website at www.mattagamiregion.ca for the latest information on watershed conditions and public advisories, or to sign up for flood notifications via email.

This message will be in effect until (or updated before) April 28, 2025.
